SUMMARY

Final-year CSE student at BRAC University with a published IEEE conference paper on deep learning for medical imaging. Hands-on with Python, machine learning and backend development (Flask, SQLite, REST APIs). Looking for an internship or entry-level role where I can apply programming and data skills to real business problems and learn from experienced teams.

EDUCATION

BRAC University, Dhaka 2021 – 2027 (expected)
B.Sc. in Computer Science and Engineering
Relevant coursework: Programming, Data Structures, Algorithms, Software Engineering, Systems Analysis & Design, Database Systems

Chattogram Govt. Model School & College HSC, 2018

Cambrian College, Chattogram HSC (transferred), 2016

Ispahani Adarsha High School, Chattogram SSC, 2016

BEPZA Public School & College, Chattogram Primary, 2005 – 2009

PUBLICATION

Efficient Deep Learning Framework for Diabetic Retinopathy Classification Using Generative Data Augmentation and Knowledge Distillation
2025 IEEE 7th International Conference on Sustainable Technologies for Industry 5.0 (STI), Dhaka · Co-author · DOI: 10.1109/STI69347.2025.11367503

- Undergraduate thesis: a three-stage screening framework using GAN-generated synthetic images, an EfficientNet-V2 + Vision Transformer ensemble, and a distilled MobileNetV2 for low-resource clinics.
- Reached 95.8% accuracy on APTOS 2019 (0.975 quadratic weighted kappa) while cutting model parameters by 96.8%.

PROJECTS

Robust Bengali Digit Recognition Python · TensorFlow · scikit-learn

- Compared HOG+SVM, a custom CNN and MobileNetV2 on handwritten Bengali digits degraded by noise, blur, rotation and low contrast (course research project).
- Built the HOG features, trained and evaluated models; distortion-based augmentation raised CNN accuracy under blur from 13% to 61%.

Bashpo Game Store – Backend · *Course project, Systems Analysis & Design* Python · Flask · SQLite · REST API

- Built a REST backend for an online game store: add games with genre, release date and cover upload, reject duplicates, and list new releases and games by genre.

SKILLS

Programming	Python, C, C++, Java, JavaScript, TypeScript
AI / Data	PyTorch, TensorFlow, scikit-learn, deep learning, computer vision
Web & Tools	React, Flask, SQLite, REST APIs, Git/GitHub, Linux
Languages	Bengali (native), English (professional), Mandarin Chinese (basic)

ACTIVITIES & ACHIEVEMENTS

- **Senior Executive**, BRAC University Entrepreneurship Development Forum (BUEDF).
- Undergraduate thesis accepted and published at an IEEE international conference (2025).
- Ranked first in class from grades 1 to 5, and in the top three from grades 7 to 9.
